FETA CHEESE LINES

How Does Our Line Work !

Filling Unit

- Height adjustable for lowering cup.
- UV Lamp
- Spraying spray
- Filling and fermentation done by servo motors
- Spraying spray

Maturation Tunnel

- The filled products are automatically taken into the tunnel.
- The tunnel speed is adjustable.
- HEPA filtered and automatic washing

Packaging Unit

- Can be produced as linear or rotary depending on the capacity.
- Cups coming from the tunnel are automatically taken to the conveyor
- Optional Slicing is available
- Placing membrane cover
- Adding salt as needed is an option
- Foil is placed on the bowl
- Discharged by attaching a plastic cover

BOTTLE AND JAR FILLING MACHINES

These linear machines can be produced as single line or double line with heads from 2 up to 12, depending on the desired capacity.

Optionally, automatic cover feeding, cover closing, labeling and collection tray can be added.

ROTARY CUP FILLING MACHINE

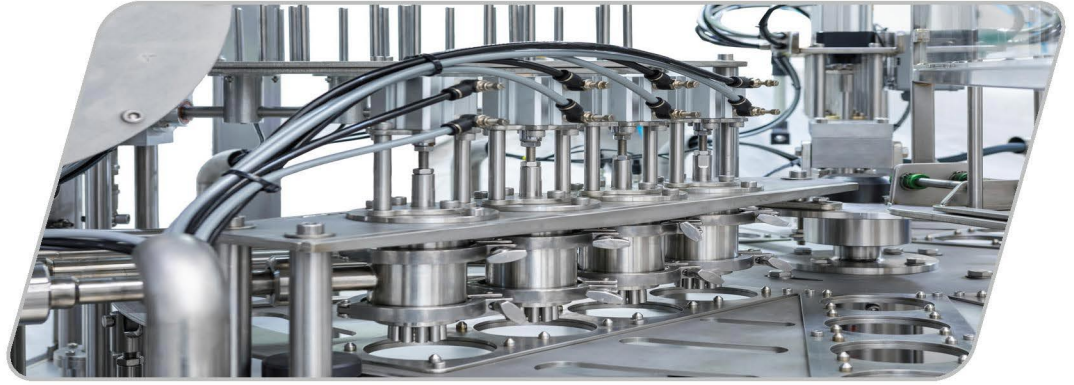

Semi-automatic and fully automatic for cup filling and packaging machine.

Filling and packaging of viscous and non-viscous products such as water, milk, ayran, cream cheese and chocolate cream are done.

USAGE AREAS OF OUR MACHINE

- Liquid Filling
- Powder Filling
- Viscosity Filling

TECHNICAL SPECIFICATIONS

Model	FTECH-1	FTECH-2	FTECH-4	FTECH-6
Capacity	1300 - 1500	2500 - 2800	5000 - 5500	7500 - 8000
Cup Diameter range	75 - 160	75 - 160	75 - 118	75 - 95
Weight range	20 - 2000 gr	20 - 2000 gr	20 - 1000 gr	20 - 500 gr

Optional Features

- UV Lamp
- Hepa Filter
- 2nd Filling
- Picking Robot
- Balance Tank with Heater and Mixer
- Ability to handle Square Cups
- Foil cutting and sticking unit
- Plastic cover putting unit
- Automatic cup feeding

LINEAR CUP FILLING

Semi-automatic and fully automatic for cup filling and packaging machine.

Filling and packaging of viscous and non-viscous products such as water, milk, ayran, cream cheese and chocolate cream are done.

USAGE AREAS OF OUR MACHINE

- Liquid Filling
- Powder Filling
- Viscosity Filling

TECHNICAL SPECIFICATIONS

Model	FL2	FL4	FL6	FL10
Capacity	2500	5000	8000	12000
Cup Diameter range	75 - 160	75 - 160	75 - 160	75 - 95
Weight range	20 - 2000 gr	20 - 1000 gr	20 - 500 gr	20 - 500 gr

Optional Features

- UV Lamp
- Hepa Filter
- 2nd Filling
- Picking Robot
- Balance Tank with Heater and Mixer
- Ability to handle Square Cups
- Foil cutting and sticking unit
- Plastic cover putting unit
- Automatic cup feeding

BUCKET FILLING MACHINE

Semi-automatic and fully automatic for buckets filling and packaging machine.

Filling and packaging of viscous and non-viscous products such as yoghurt, cream cheese, chocolate cream, ketchup, mayonnaise can be done.

TUBE FILLING MACHINE

According to your product tube shape needs we can perform the production of tube filling machines to be suitable for either Food or Cosmetics industry as needed.

LABEL AND STICKER MACHINES

Our sticker labeling machines makes it possible to do single or double-sided labeling for your products, and also top labeling is possible as well.

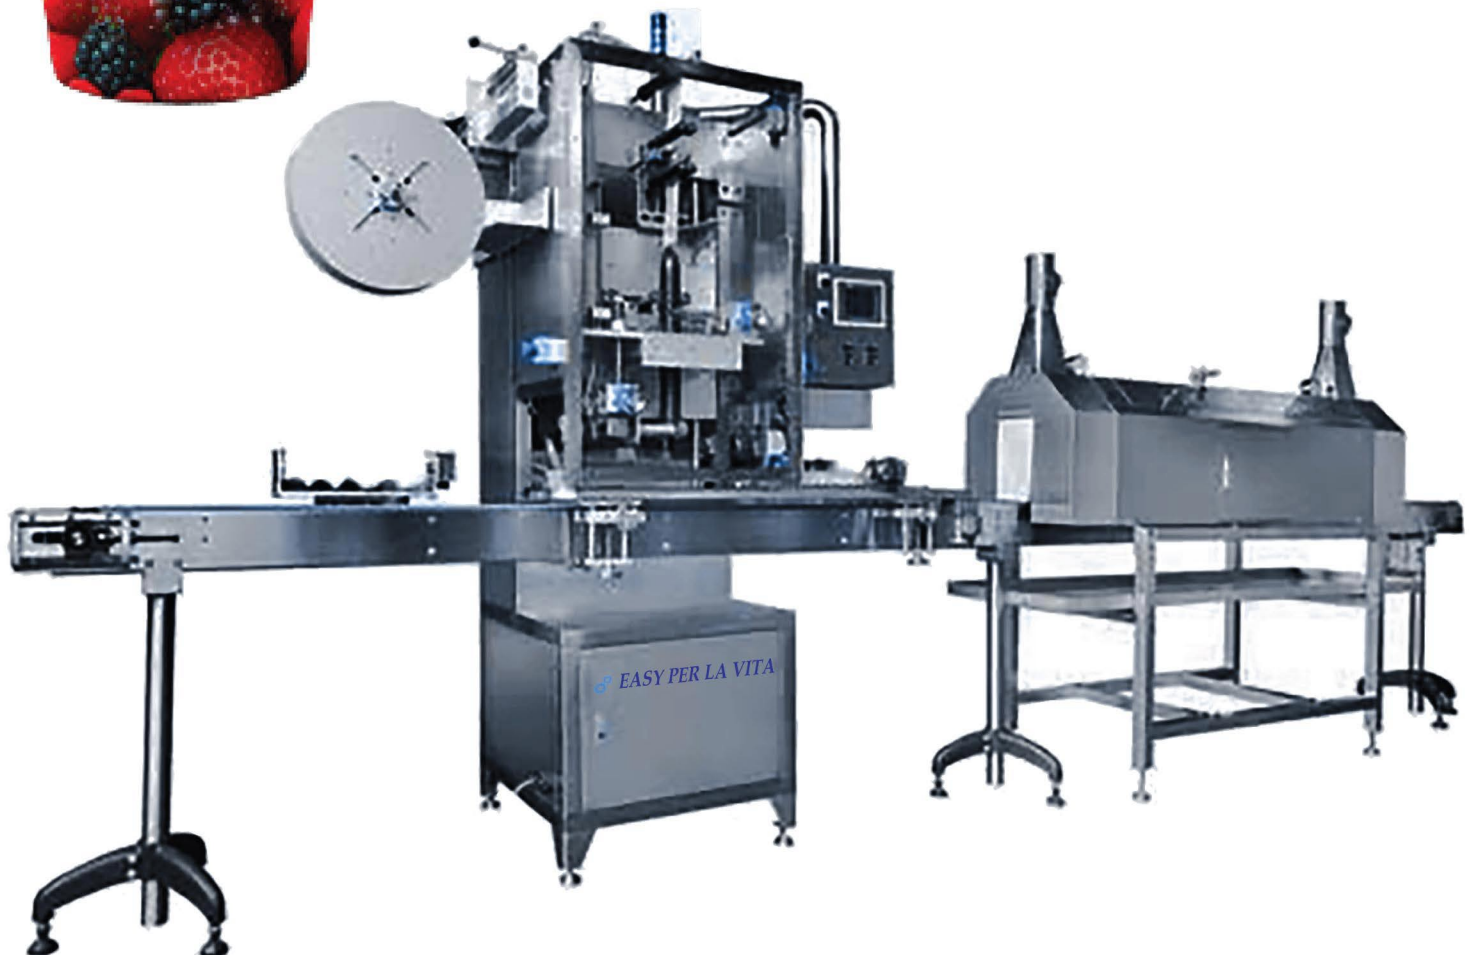

Our machines can label all types of bottles, jars and buckets.

SHRINK TUNNEL BODY SLEEVE AND TUNNEL

FULLY AUTOMATIC BODY SLEEVE DRESSING AND STEAM TUNNEL MACHINES.

HONEY SPOON FILLING MACHINES

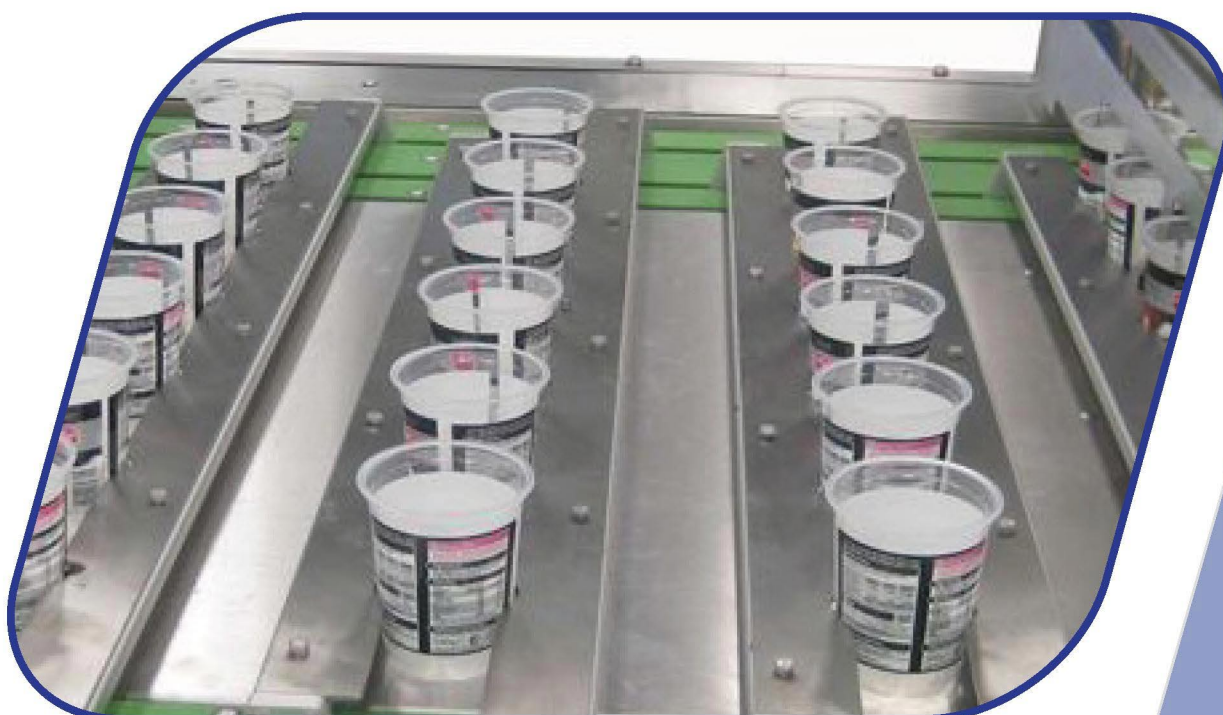

TECHNICAL SPECIFICATIONS

Model	FTECH-1	FTECH-2	FTECH-4	FTECH-6
Capacity	1200	2000 - 2400	4000 - 4200	5500 - 6000
Weight range	5 - 20 gr	5 - 20 gr	5 - 20 gr	5 - 20 gr

TRAY SEALING (MAP FEATURED) MACHINES

Fully Automatic MAP Packaging Lines are machines capable of sealing with vacuum and Gas. Thanks to the PLC Unit fitted with, it can work compatibly with all kinds of auxiliary accessories such as plate feeding, automatic filling, UV devices.

MANUAL MACHINES

BUCKET FOIL SEALING MACHINE

**VACUUM AND
GAS FOIL
SEALING**

MANUAL FILLING AND CLOSING

Produced in Turkey and Italy
Exported to the World
